

PAYMASTER

SELF PAY KIOSK

THE SELF-SERVICE SOLUTION COMPLETES THE SECURECASH FAMILY

The Paymaster self-service kiosk allows commerce in all sectors to reduce their personnel costs, generating savings in general expenses. In this way, employees can focus fully on the needs of customers, allowing them to improve the service. Paymaster technology accepts payments, can help stores increase revenue, increase traffic and create a better experience for the customer.

Thanks to the Paymaster we help companies to strengthen their image as high-tech commerce.

FEATURED FUNCTIONS

All those described in Securecash MK I.

Integrated 15-inch screen.

Contactless card reader, chip and magnetic stripe.

Our card payment solution **does not require a gateway of payment** since it connects directly with "Redsys" without need for any intermediary, with the consequent saving for the commerce.

BENEFITS FOR THE CLIENT

Increase your income by operating 24/7.

Expand your geographical presence.

Reorganize your staff to improve their efficiency.

With a self-service application to pay bills, a service provider can save money and create a best experience for the client.

BENEFITS FOR THE PARTNER

Possibility of offering customized solutions without needing large volume orders.

Expand your portfolio with quality self-service solutions and philosophy of banking environment.

Collaborate with a company with 35 years of experience in the retail & banking market.

Offer security to your customers for credit payments and debit with our direct connection system without need for payment gateways.
